

The Face of Spinal Health

TEXAS BACK INSTITUTE – DR. SCOTT KUTZ

texasback.com, 972.608.5100, 5858 West Main Street, Suite 120, Frisco, Texas 75034

Dr. Scott Kutz is excited to become part of the Frisco community, and is a proud member of the Texas Back Institute surgical staff, bringing a higher level of neurosurgical care to North Texas. "Medicine is a divine calling for me," he shares. "From a very early age, I felt compelled to help people. As a neurosurgeon specializing in spine surgery, I bring a different set of expertise and perspective to Texas Back Institute's traditionally orthopedic spine practice. I strive to help my patients find relief from their neck and back pain."

Dr. Kutz specializes in the diagnosis and treatment of spinal disorders such as degenerative disc disease, herniated discs, spinal stenosis and spine tumors, and he has a special interest in minimally-invasive surgical procedures and artificial disc

replacement, as well as the treatment of sacroiliac joint disorders.

Dr. Kutz recently moved to Frisco from Springfield, Mo., where he practiced for 11 years. He is a member of the American Academy of Neurosurgeons, the Congress of Neurological Surgeons and several other professional organizations dedicated to upholding high professional standards and continuing education.

"I am proud to join Texas Back Institute, which is known for leading the way in minimally-invasive spine surgery, and was the first practice in the U.S. to perform the artificial disc replacement procedure," he shares. Texas Back Institute offers a wide range of surgical and non-surgical treatments and is revolutionizing spine care while changing patients' lives.
