

Isador H.
Lieberman, MD, MBA, FRSC

Specializing in surgical treatment of spinal disorders, Dr. Lieberman is the director of the Scoliosis and Spine Tumor Center at the Texas Back Institute and the Chair of the Orthopaedics Department at the Texas Health Hospital Plano.

Recognized both nationally and internationally for his contributions to minimally invasive/endoscopic spinal surgery and for his contributions to treating osteoporotic vertebral compression fractures and for his research, Dr. Lieberman has been instrumental in advancing the use of minimally invasive spinal surgery techniques to treat herniated disks, lumbar degenerative disorders, osteoporotic vertebral compression fractures, and scoliosis. He has more than 70 peer-reviewed publications and more than 40 book chapters to his credit; he has presented more than 150 invited lectures. Dr. Lieberman is the editor of *Minimal Access Spinal Surgery*, was the senior editor for *Advances in Osteoporotic Fracture Management*, and is a member of the editorial review boards for *Spine*, the *European Spine Society Journal*, the *Journal of Bone and Joint Surgery*, and the *Journal of Spinal Disorders & Techniques*.

After completing medical school and his residency at the University of Toronto, Dr. Lieberman studied spine surgery and trauma surgery fellowships at the Toronto Hospital in Canada and at Queen's Medical Center in Nottingham, England. He obtained his master's degree in business administration from Cleveland State University.

Along with his clinical responsibilities in the United States, Dr. Lieberman established the Uganda Charitable Spine Surgery Mission, which provides services to the less fortunate in Uganda who are afflicted with spinal ailments including tuberculosis and scoliosis.
